BLOQX™ 6 is the formula for hours of thrilling climbing, play and meeting. The combination of iconic, geometrically shaped blocks appeals intensely to older children. With its fine climbing grips, it invites scalable climbing challenges and games. The design has ridges and valleys which provides room for socializing and exchange. The possibility of climbing, crawling

and balancing at your own speed, height and length makes the BLOQX™ a successful gathering place for children at different climbing levels, again and again. levels: The creation of new climbing routes and methods with friends or individually makes for hours of thrill and climbing play. The varied grip and panel positions help to develop muscle strength and

motor skills: cross-body coordination, proprioception and spatial awareness, having a positive impact on concentration skills and social-emotional skills such as consideration.

Climbing grips grid

Cognitive: logical thinking when figuring out routes and memorizing position of grips you can't see when climbing.

Inclined panels

Physical: sense of balance when seated for breaks, and proprioception. Bone density when jumping down. Bone density is built up in youth to last the rest of your life.

Social-emotional: meeting points from where to help other children. Turn-taking and helping out are common activities on the BLOQX™.

Meeting point

Physical: sense of balance when seated for breaks on an inclined surface.

Social-emotional: socializing, turn-taking, consideration of others.

Multiple climbing blocks

Physical: develop sense of balance, proprioception and spatial awareness. Heavy duty training of arm, leg and core muscles when climbing longer. More points for strengthening bone density when jumping down.

Social-emotional: cooperation, consideration, turn-taking, risk-taking, self-confidence when self-regulating and helping others.

Cognitive: logical thinking when figuring out longer routes.

Climbing grips

Physical: dexterity and cross-body coordination, sense of space, all important in navigating the body in space. Pushing, pulling and using fingers, arms, legs and core, strengthen the muscles.

BLX4106

High pressure moulded PP climbing panels with excellent impact strength and usable within a large temperature span. The outside surface has an integrated pattern and surface texture that is dirt repellent.

Die-cast corner brackets of high quality lead free aluminium. The corner brackets have nicely rounded edges and countersunk stainless steel screws. For sunny environments the corner bracket can be supplied with optional powder coating which reduced the heat absorption of the brackets.

Climbing Grips are KOMPAN customized design, based on professionally designed climbing grips for optimal play value. The base material is polyester. There are two colours of climbing grips (green & black) and three on each panel. They are rotation secured by a steel pin.

The cubes are supported by a unique designed footing system that secures the correct positioning of the cubes.

To ensure maximum safety in all weather conditions a non-skid safety plate is located when climbing down from the elevated cube. Further, a number of the top corner brackets are covered with soft PUR.

Greenline Bloqx products are built of molded PP panels which consist of 75% recycled post consumer ocean waste and 25% virgin material. The panels are designed with a unique pattern that provides a non-skid surface texture. GreenLine ensures the lowest possible CO2e emission factor.
