The Loops modular elements are made of rotation molded polyethylene (PE) with at thickness of 6-7mm. The Loops are UV-resistant, have excellent impact strength and are usable within a large temperature span.

The product molds are textured through abrasive blasting, enhancing surface friction and reducing slipperiness ensuring a safer experience.

The Loops come in a variety of standard colors, offering options to personalize your product and ensure a perfect fit for your intended space.

The Loops are made from 33% post-consumer recycled plastic and the teal color is made with sea waste, to offer the most sustainable solution.

The Loops can be anchored to the ground by filling them with water or sand using integrated plugs. Alternatively, they can be secured using surface or ground brackets.

This product withstands most cleaning agents and chemicals and can be cleaned using a high-pressure cleaner. The color can be revived using vinyl cleaner or similar.
